

Description

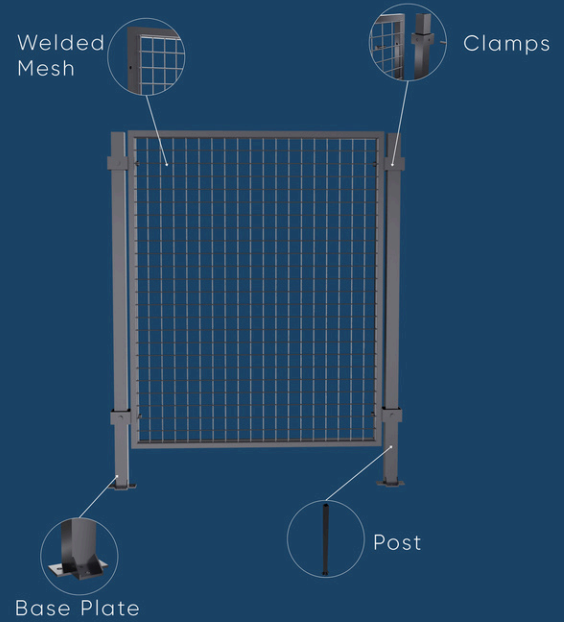

The Hi20 partition panel is built for demanding industrial environments with a durable 20x20 mm, 2 mm thick steel frame. For panels over 2 meters, a central support tube enhances rigidity. Its 4 mm steel wire mesh with a 50x50 mm grid ensures visibility and security while preventing unauthorized access. Available in heights of 1250mm and 2050mm, and widths from 300mm to 2000mm, it offers extensive layout options. A 300mm extension adds customization, with strategically placed holes for seamless installation. Finished in durable RAL black powder coating, Hi20 combines functionality, aesthetics, and flexibility, with custom colors and finishes available.

- Hot deep Galvanized (BS EN 1461) or equivalent
- Powder coated (BS EN 13438) or equivalent.

Hi20 PS Panel

Features

- Robust 20x20 mm Square Tube Frame
- Smartly Welded 4mm Steel Wire Mesh
- Strategically Reinforced for Panels
- Diverse Range for Customization
- 300mm Width Extensions
- Powder Coating in RAL Black for Longevity
- Personalized Finish Coatings and Colors
- Designed for medium to large scale hazards
- 100% Stronger
- 100% Tested
- 100% Strengthened
- Ease of Installation
- Impact resistant
