

## Description

The HI 30 Machine Guarding Panel provides durable safety for machinery with its 30x30 mm square hollow tube frame and 4mm steel wire mesh. Panels over 2 meters include added support to prevent bending. Pre-drilled holes and 150 mm ground clearance ensure easy installation. Available in widths from 300mm to 2000mm and heights of 1250mm or 2050mm, with 300mm extensions for added flexibility. Finished in RAL black powder coating, the panel offers both functionality and style. Hitech also offers custom colors and coatings to meet specific requirements.

- Hot deep Galvanized (BS EN 1461) or equivalent
- Powder coated (BS EN 13438) or equivalent.

## Combine With

## Hi30 MG Panel

## Features

- 30x30 frames Size
- Designed for medium to large scale hazards
- Smart welded
- Reinforced with central support
- 100% Strong
- 100% Tested
- 100% Strengthened
- Powder Coated
- Galvanized
- Ease of Installation
- Impact resistant
- Good color stability
